

FORCAM ENISCO GmbH Expands Presence in India Through Collaboration with JASAN Automation in Pune

- Project partnership for MES solutions (Manufacturing Execution System)
- Three concrete joint projects at the start
- "India has a fast-growing manufacturing industry, Pune is an ideal location"

Böblingen (Germany) / Pune (India), March 2024. German smart factory expert FORCAM ENISCO GmbH, a leading provider of Manufacturing Execution Systems (MES) and Digitalization solutions, has entered into a strategic partnership with [Jasan Automation Private Limited](#), specialist in Engineering and Technology Services based in Pune, India. Together the partners will deliver the MES solutions to manufacturing companies in India.

Werner Gruber, Managing Director of FORCAM ENISCO, explains: "This partnership is an important milestone in our commitment to expand our presence in India and drive MES and digital transformation in the region. India has a fast-growing manufacturing industry, driven by original equipment manufacturers from various sectors and attracting significant investments. And Pune, known as one of India's major industrial hubs, is an ideal location for this market."

Santosh Dongerpure, Managing Director of Jasan Automation: "We are a young and fast-growing company. With our new partner FORCAM ENISCO, we can offer best-in-class MES software from Europe which is highly attractive to Indian companies."

And Jacek Tomczak, also Managing Director of Jasan Automation, adds: "We are delighted to have FORCAM ENISCO among our shareholders, and we are equally pleased to be discussing three concrete projects to implement together."

Solutions for every stage of digital transformation in discrete manufacturing

The FORCAM ENISCO group supports companies in sustainably securing their competitiveness through smart manufacturing. The modular MES solution world and the consulting and services of FORCAM ENISCO cover every stage of a digital transformation in discrete manufacturing.

MES LITE – Entry level solution for a quick start of the Smart Factory

FORCE MES LITE is the right choice for medium-sized companies looking to get started with digital manufacturing. The solution offers two standard packages:

- Machine Availability
- Overall Equipment Effectiveness (OEE)

MES FLEX – Flexible platform to freely compose apps and solutions

FORCE MES FLEX offers a flexible platform to increase the efficiency in production lines and to sustainably support the continuous improvement process (CIP). The platform offers comprehensive MES function packages – from detailed planning and document management to performance analysis (OEE), traceability (track and trace) and energy monitoring.

E-MES – Modular solution for half or fully automated production lines

ENISCO's modular E-MES networks the factory both horizontally, across the entire production process, and vertically, across all process levels. Due to its integrated data acquisition, analysis and display, it ensures consistently transparent production and logistics processes and thus forms the basis for every Industry 4.0 solution.
