

## Securing added value along the entire supply chain - FORCAM ENISCO and BDF EXPERTS cooperate

- SAP partners work together to ensure greater transparency and resilience in supply chains
- First use case for repetitive manufacturing presented on SAP booth at Hanover Fair 2025

*Böblingen/Düsseldorf, May 2025 - The Smart Factory specialist FORCAM ENISCO cooperates with the consulting and software company bdf consultants GmbH - BDF EXPERTS ([www.bdfexperts.de/en](http://www.bdfexperts.de/en)). The two SAP experts have entered into a strategic partnership. The first joint example of customized repetitive manufacturing was presented on the SAP booth at this year's Hanover Fair.*

The aim of the cooperation is to offer customized services to manufacturing companies for higher added value through smooth supply chains. Both partners will combine their areas of expertise - FORCAM ENISCO's competence in smart manufacturing and BDF EXPERTS' competence in smart supply chains and product data management. The initial focus will be on companies with customer-specific series production.

### "Securing value creation in the factory along the entire supply chain"

Oliver Hoffmann, Managing Director of FORCAM ENISCO: "Robust supply chains are a top priority in the current situation. Companies must be able to react in real time to adapt to new market conditions. This is only possible through digitalization and automation. As industrial value creation takes place in the factory, it is important for companies to ensure the value of production through transparency across the entire supply chain. We bring many years of experience and innovative factory software solutions to the table. By pooling our expertise with BDF EXPERTS, we can provide companies with the best possible support in securing value creation in the factory throughout the entire supply chain."

### "Central database to make supply chains more resilient and agile"

Dr. Ulrich Schmidt, Managing Director of bdf consultants GmbH (with the brand BDF EXPERTS): "In the digitalized value chain, the seamless integration of product data is the key success factor. With SAP PPG, we are creating the central database that companies need to make their supply chains resilient and agile. By combining our digital supply chain expertise with FORCAM ENISCO's shop floor knowledge, customers can not only optimize, but completely rethink their production processes. Together, we offer an end-to-end solution that creates transparency from product design to delivery and delivers measurable efficiency gains."

## SAP partners with proven expertise in their fields

As SAP partners, both companies are specialists in their fields:

- FORCAM ENISCO offers certified expert teams for the SAP Digital Manufacturing (SAP DM) solution. SAP DM is systematically implemented according to a proven 8-phase model. FORCAM ENISCO also offers the innovative "NextGen" solution [AC4DC](#) for machine data collection. AC4DC ensures highly available and secure data streams through simple networking of heterogeneous shop floor assets and equipment.
- BDF EXPERTS offers the solution "SAP Product and Process Governance by BDF" ([SAP PPG](#)). SAP PPG enables companies to integrate, maintain and retrieve all data in the product lifecycle in SAP. BDF EXPERTS thus create the central database for end-to-end processes - from product development and production to the use of the SAP Business Data Cloud.

## First joint use case on SAP booth at Hanover Fair 2025

At Hanover Fair 2025, the two partners presented a first use case on the topic of customized repetitive manufacturing. The theme was "Optimizing the entire supply chain through data-driven manufacturing".

The use case demonstrated the functional approach of SAP Supply Chain Management (SCM) using a practical example - the production of a car steering wheel. The demonstration showed how the integration of product data by SAP PPG from BDF EXPERTS with production control by SAP DM from FORCAM ENISCO leads to a seamless process chain.

## About [FORCAM ENISCO](#)

The FORCAM ENISCO GmbH group of companies supports medium-sized companies and corporations in sustainably securing their competitiveness through smart manufacturing.

With its modular Manufacturing Execution System (MES) solutions and its consulting expertise as an SAP Silver Partner for the implementation of SAP Digital Manufacturing (SAP DM), FORCAM ENISCO covers all stages of the digital transformation in discrete manufacturing - from the entry into data-driven production and the automated control of complete production and logistics processes to cross-plant and cross-border rollouts.

Customers include AUDI, Bizerba, Daimler Truck Buses, IKEA, Jungheinrich, Siemens Energy, Swarovski Optik, and Voestalpine. FORCAM and ENISCO employ about 150 people worldwide and are represented in the DACH region with offices in Böblingen, Heidelberg and Ravensburg. International subsidiaries are located in France, the USA, China and India.

**About BDF EXPERTS – <https://bdfexperts.de/en#home>**

BDF EXPERTS is the brand of bdf consultants GmbH, a leading SAP Silver/SolEx partner with comprehensive expertise in the areas of Digital Supply Chain and Corporate Finance & Treasury (CFT). For more than 25 years, BDF EXPERTS has been supporting companies on the basis of SAP ERP and S/4HANA in achieving measurable added value through end-to-end digitized processes.

BDF EXPERTS has developed special expertise in holistic data management in the **digital supply chain**. With **SAP PPG** (Product and Process Governance), BDF EXPERTS offers an innovative solution for the central management of all product and process data in SAP, thus creating the basis for data-driven business models. The consulting services cover all business processes of Product Lifecycle Management (PLM) - from data import and document management (SAP DMS) to the entire supply chain (SAP SCM, MM, PP, PS, SAM).

In the area of **Corporate Finance & Treasury**, BDF EXPERTS offers specialized solutions for financial processes, cash management, risk management and compliance. With customized SAP implementations, we optimize financial flows, increase transparency and support sound decision-making processes in the treasury area.

Our customers range from innovative SMEs such as Groz-Beckert and Thermofin to global corporations such as Schüco, Scheuch, Haniel, Hilti, Bitburger, ThyssenKrupp and many more. The company has 55 employees at its locations in Düsseldorf and Munich. With BDF EXPERTS AG, a subsidiary of bdf consultants GmbH based in Neuhausen am Rheinfall, the company serves customers in Switzerland and Austria.
